

Washington Post Service SEOUL — The ruling party's presidential candidate, Roh Tae Woo, said Tuesday that a wave of labor unrest threatened the drive toward democracy in South Korea, and he appealed to management and labor to exercise "self-restraint" to resolve the spreading trouble.

Mr. Roh said in an interview that "we should watch very carefully" what he called radical "outside forces" seeking to take advantage of the sudden release of long-standing government pressure to hold down wages.

At the same time, Mr. Roh said that the main demands of workers for higher pay were reasonable and that in the past the government was "unfair" in intervening too extensively in labor-management relatioas.

Mr. Roh's comments came as wildcat strikes disrupted operations at about 140 companies, including some of the largest and most successful enterprises in South Korea. Hyundai Motor Co. had to shut

down for the second time in a week because strikes among its suppliers cut off the flow of essential parts. The Daewoo and Kia Motor companies were also closed by supplier strikes while major shipyards, coal mines, and bus and taxi companies halted operations when their workers walked out. Mr. Roh, who on June 29 dra-

matically embraced opposition de-mands for direct presidential elections and other changes, said that loosening government authority was bound to lead to "exploding demands in various sectors of our society." He added, "This is what

Official spokesmen, business

Ki, warned in a statement that "if labor disputes continue to threaten the economy, the government will take tough actions against them."

INTERNATIONAL HERALD TRIBUNE, WEDNESDAY, AUGUST 12, 1987

## In Corsica's Latest Bloodshed, a Trace of Desperation

By James M. Markhum Yes York Times Service

AJACCIO, Corsica - It has been a gorgeous summer on Corsica, with the sun smiling down from sapphire skies on beach-goers and wind-surfers skimmi over the Mediterranean waters. But it has also been a deadly summer.

On Aug. 4, extremists from the Corsican National Liberation Front ambushed a police patrol outside the northern town of Bastia, killing one gendarme and wounding three. In June, Jean-Paul Lafay, a veterinarian who had campaigned against terrorist violence, was assassinated.

The Lafay killing was timed, defiantly, in fail a day after Interior Minister Charles Pasqua of France, himself a Corsican, had visited the island and warned that its grave economic problems could not be resolved "without the re-establishment of civil peace and tranquillity."

A week rarely passes here without a bank robbery, a bombing or the nocturnal spraying of builets at a gendarmeric post. Yet some say the latest upsurge in violence may be a symptom of the extremists' growing isolation and weak-

ness, and not of their strength. For more than a decade, Corsica, a ruggedly beautiful island, has

been gripped by a struggle be-iween its entrenched, conservative political clans and an upstart group of outsiders who have demanded greater autonomy and oned. even independence for Corsica, which was acquired by the French monarchy in 1769 through a legally dubious transaction with the public of Genoa.

The nationalist movement emerzed in the 1970s as a protest against an influx of enterprising French newcomers from newly independent Algeria and amid a spasm of dislocations, including the collapse of traditional agriculture, the cultural shock of mass tourism, an erosion of the distinctive Corsican language and a widespread sense that Corsica was being exploited and neglected by

## Soviet Satellite Plunges Into Pacific

COLORADO SPRINGS (UPI) — A Soviet satellite re-entered the Earth's atmosphere and plunged into the Pacific Ocean on Monday, 10 days after it was launched, U.S. officials said. U.S. officials tracked the satellite, known as Cosmos-1871, as it fell out of its point other and subched into the nown as Cosmos-1871, as it fell out

of its polar orbit and splashed into the ocean 3,000 miles (4,800 kilometers) from New Zealand. The Soviet news agency Tass had reported that the satellite weighed 10 ions and carried scientific equipment to continue. space exploration.

Sauders Kramer, • U.S. expert on Soviet space programs, said it was not clear what type of satellite it was. "It's a mystery." he said. "We're wondering what is going on." . .

### 3 Blasts in Pakistan Kill 11, Injure 45

PESHAWAR. Pakistan (Reuters) - Three bombs exploded Tuesday in a market town in northwest Pakistan, killing 11 persons and injuring 45. local officiais said.

The bombs exploded in Mardan, a town in the North-West Frontier Province, which borders on Afghanistan. They were the latest in a series of bomb attacks that have killed more than 150 people in Pakistan this

The deputy commissioner of Mardan, Sahabzada Riaz Noor, said Iwo bombs went off near the bus station and a third exploded in a busy bazaar area around midday. No one claimed responsibility for the blasts. In Peshawar on Friday, a bomb killed two persons and injured 35. In July, at least 75 people were killed and about 300 injured when two car bombs exploded in Karachi.

### 7 Die When Boulder Hits Bus in U.S.

WINTER PARK, Colorado (AP) — Governor Roy Romer of Colora-do says his state accepts responsibility for the death. of seven sightseers after a boulder dislodged by a state highway crew tumbled down a mountainside and smashed into a tourist bus.

"It's a terrible accident," the governor said Monday. "Quite frankly, agreement reached with Mr. tees of civil rights. It provides no it's our responsibility to make it right."

The tour bas was carrying 28 persons along a road in the Rocky Mountains when it was hit by the boulder on Monday. Six persons died at the scene and a seventh died later at a Denver hospital. Fifteen persons were injured in the accident, which occurred about 60 miles (100 kilometers) northwest of Denver."

## **TRAVEL UPDATE**

### **Complaints on Airlines Soar in U.S.**

WASHINGTON (AP) - Consumer complaints about airlines inreased dramatically in July over the same filonth last year, the U.S." Transportation Department said, with Continental, Northwest and Eastern receiving the most criticism. There were 5,995 complaints against U.S. airlines last month, com-

part with 932 in July 1986, the department reported Monday. It received -255 complaints about foreign carriers, compared with 91 a year earlier.

Most of the complaints, 2,658, involved flight problems, while baggageindling was second, with 1,358. The department said the large number of airline mergers bad contributed to a sharp increase in complaints so far in 1987. Continental was the most airline most criticized in July, with 1.541 complaints filed.

### **Belgium to Proceed With Road Tax**

BRUSSELS (AFP) - Belgium is to proceed with its plan to impose a pecial tax on foreigners using the country's highway system, Prime Minister Wilfried Martens said Tuesday.

The tax of 500 Belgian francs (\$13) a year is to be introduced next year, he said, but it must obtain parliamentary approval. Foreign drivers will be required to buy and display a windshield sticker, showing that they have paid the tax. International road transport organizations have opposed the plan.

A British Airways Concorde with 93 passengers on board blew five of its 10 tires on landing at Kennedy International Airport in New York on Tuesday, but there were no injuries and no damage to the aircraft, the company said. (Reuters)

Tourists fled their botels and three villages were evacuated as a forest fire swept the Greek island of Rhodes on Tuesday. The governor of the Dodecanese region. Yannis Macharaidis, said that 25,000 acres (10,000 hectares) had been affected, but the government department dealing with natural disasters said it was too early to issue an estimate. (AFP)

A Delta Air Lines jetliner passed within 100 feet (30 meters) of a singlecogine Cessna on Monday about 20 miles (30 kilometers) northwest of Fort Worth, Texas, a spokesman for the Federal Aviation Administration said Tuesday. (AP)

## OIL: No World Supply Crisis Is Seen Despite Increasing Tensions in the Gulf

## **Studies Split On Reagan's Record** on **Economics**

Page 3

By Nathaniel C. Nash New York Tumes Service WASHINGTON - The Joint Economic Committee of Congress has reaffirmed that economics is far from a nonpartisan science.

In its midyear assessment, the Democratic majority issued a stinging report on Monday warning about the long-term consequences of the U.S. debt owed to foreigners. put at \$264 billion at the end of last year, while the Republican minority praised President Ronald Reagan's economie policy as the reason for almost five years of economic expansion, low unemployment, low inflation and low interest rates.

"We have fallen from the position of the world's major creditor to become the world's largest net debtor," said Senator Paul S. Sarbanes, Democrat of Maryland and chairman of the Joint Economic Committee, on the majority staff's report, titled, "The Economy at Midyear: A Legacy of Debt."

"The foreign debt represents an enormous potential claim on the American standard of living of future generations," he said.

"Like 'Old Man River,' the economy just keeps rolling along," said the Republican report, uitled "Setting the Record Straight: The Phoenix Expansion."

The report continued: "Credit for this dramatic economic recovery and persistent expansion is readily traced to the free-enterprise foundation of our economic system and the Reagan administration's adherence to sound economie principles."

In the report by the Democratic majority. America's net investment position is traced from 1981, when was a net creditor with a \$141. billion surplus, to the end of 1986, when the net amount owed to forcigners hit a record \$263.6 billion

a \$405 billion deterioration in the U.S. position in five years." It attributed the reversal to a

complex series of events, including the uncompetitiveness of American exports because of the high value of . the dollar, excessive government spending that created too much demand for imported goods and ser-

vices, an unwillingness by Japan and West Germany to stimulate consumption in their own econo-mies and an inability by Third World countries to import more from the United States.

Although acknowledging that the recent drop in the value of the dollar seems to be improving the trade picture, the committee staff cited estimates that the growth in the deficit would not stop until the 1990s, at which time the United States would have foreign debt outstanding of \$700 billion to \$800 billion.

Egypt Cancels News Coverage **Of Maneuvers** 

> Washington Past Service CAIRO - Egypt has canceled news media coverage of upcoming Egyptian-American military ma neuvers, opting instead to give the exercises minimum visibility in light of recent riots to the Saudi Arabian city of Mecca and Iranian threats against the United States and its "lackeys."

> The five-day Bright Star exercises, biannual events that include joint land, sea and air maneuvers, are scheduled to begin Saturday. About 9,000 American troops and an equal number of Egyptian soldiers are expected to participate. U.S. troops and equipment already

have arrived in Egypt. Observers said the decision by the government of President Hosni Mubarak to cancel news media coverage, which was shaping up to be the most extensive to date, is an attempt by Egypt to avoid provok-

ing Iran. Since the clashes between Iranian pilgrims and the Saudi police in Mecca almost two weeks ago, in which at least 275 Iranians died, tension in the Arab world has increased. Iran accused the United States of being behind the violence and threatened to retaliate against the United States and its "lackeys." Sources said Tehran might view highly poblicized American maneuvers to Egypt as a provocation.

## Herald Eribune.

## **Back the Black Miners**

in South Africa has been merely preliminary. The strike of black miners against the country's gold and coal producers is the main event. Black unions like the mineworkers, acting lawfully, offer the best remaining hope for a peaceful transition to democracy. It is in the interest of South Africans, black and white, that the miners succeed. It is in the interest of the United States and the West to help them in any way possible.

Page 1

Cyril Ramaphosa, general secretary of the National Union of Mineworkers, has assessed the stakes for South Africa's black masses astutely. "If we win this strike," he said, "it is going to be a significant motivation for all other workers in continue with their own struggle for a living wage. If we

lose, it will have a devastating effect." The key issue is fair pay. The black min-ers take home \$150 to \$250 a month. They want a 30 percent raise. That would still leave them with less than half the typical white miner's \$750. The South African Chamber of Mines, representing five com-panies with 73 mines, imposed raises of 15 to 23 percent. The union called a strike; strike leaders now claim that almost half the mines have been affected.

The dispute is oominally between workers and private employers. But the government has a large stake in it as well. The country's 51 gold mines last year yielded 640 tons, which accounted for 60 percent of

In a sense, much that has been happening foreign exchange earnings. Even a brief disruption of production could rock the already ailing South African economy.

More worrisome to the government is the growing power of black unions. When they were legalized 10 years ago, it was thought that they would be escape valves for black discontent. Instead they have become crucibles of hlack power. While the law bans political activity by unions, the line between economic and political activity is necessarily indistinct. That ambiguity could provide an excuse for the government to step in and break the strike - or even the union.

The first task for the United States is in make Pretoria understand clearly that any such action would demonstrate bad faith in the most elementary of human rights issues. Washington and the West can also make plain that they will take whatever steps practicable to show their displeasure. One fitting penalty would be to ban the export of mining equipment to South Africa. Other measures are still available in addition in the sanctions that the United States has already imposed. The Reagan administration remains oddly insensitive to the rigidities of the white government, even when it would be so right, and easy, in proclaim solidarity with the courageous miners. If South Africa cares at all about its standing in the civilized world, it will do no less than deal fairly with a

legally constituted union. - THE NEW YORK TIMES.

## Free Speech vs. Secrecy

Guardian, has described his own country, Britain, as "the least free and least democratic of any Western European country today." The reason for his chagrin is the Thatcher government's campaign to sup-press reports on the memoirs of a retired intelligence agent. Peter Wright. For Americans exhausted hy discussion and analysis of U.S. national security operations this summer, the saga of Mr. Wright's book, "Spycatcher," is a reminder of how very differently the two countries treat freedom of speech and of the press when the government tries to keep sensitive material secret.

Because of contractual obligations of secrecy binding on all government employees, "Spycatcher" was not published in Britain. The book contains some sensational charges, among them that intelligence agents con-spired to discredit Harold Wilson's Labor government because they believed that the prime minister was under the influence of the Soviets. The Thatcher government has tried to stop publication of the book in Australia, where Mr. Wright now lives, and has moved in court against newspapers both at home and in Hong Kong that have published ex-

Ken Dodd, executive editor of The cerpts from and descriptions of the contents. Last month, Britain's highest court of appeals upheld the government in proceed against British papers and extended the ban to prohibit the publication of reports on evidence and arguments presented during the court hearings in Australia. All this litigation may be useless in practi-

cal terms. The book has been published in the United States and copies of the American edition are being sold on the streets of London. A former Labor cabinet member has defied the government by reading "Spycatcher" aloud at Hyde Park Corner.

The British government has had wide powers in suppress publications in the interest of state security or, some allege, to spare itself great embarrassment. This case has prompted debate on the wisdom of allowing such restrictions. It is not easy to deal with sensitive information in a public forum, but it is even more difficult, notwithstanding the efforts of international litigators, to keep a secret in one country when it is published as news in another. Ask the people in Washington, who saw their secret Iran dealings blown in a Middle Eastern newspaper last fall. - THE WASHINGTON POST.

**Exploitation of the Sea** 

When a team of scientists in 1985 found the wreck of the Titanic 13,000 feet (4,000 meters) under water, the most moving of the many slides they brought back were the ones of dinner plates and wine bottles scattered on the ocean floor. Last month a French expedition retrieved some of those plates, along with other items, in a widely criticized attempt to "salvage" some of the more valuable "artifacis" from the wreck, whose discovery had been an eerie, saddenall those who grew up

Recherche pour l'Exploitation de la Mer). Back in the first euphoric days after the initial discovery, the French group accused the Americans of releasing their share of the dramatic expedition pictures too early, thus lowering the value of the ones allotted to France. The motives for this salvage operation are likewise partly financial: Rumors abound of jewel boxes and treasure chests that were accompanying their wealthy owners across the Atlantic. French oceanograricans, are

pression" of the president's decision.

Indeed, the witne

D URHAM, North Carolina — Is Irangate Watergate revisited? As in Watergate, one little accidental revelation popped open a fantastic political can of worms, a pile of twisted deceptions, a tangle of operations running outside the onnstitutional fence. As in Watergate, what looked at first like a low-level imbroglio soon crawled up in the White House and eventually into the lap of the president himself.

But there the similarity ends.

President Reagan is as guilty for his failure to "take care that the laws be faithfully executed" as Richard Nixon was, but their sins are very different. If there is a civics lesson here, it is that watching out for another Richard Nixon will not protect America from another Ronald Reagan.

Mr. Nixon's problem was conspiracy; his tight-by calculated secret operation to nail down his enemies and thus confirm his power. What he knew and when he knew it were relevant questions; it turned out that he was deeply involved in the details. The cover-up story was similarly signif-icant; information had to be wrenched out of the administration bit by bit, against hard resistance. And at the core of the story was Mr. Nixon, yet another president driven into tragedy by his in-

Viewing the Iran-contra scandal through the Watergate lens doesn't work. The former illustrates a different but equally dangerous type of presidential fasco that Americans have to learn to guard against. President Nixon drove his disaster; nt Reagan floated into his.

In November 1986 the news broke in Lebanon that America was trading arms for hostages, de-spite Mr. Reagan's hand-on-the-heart statements that no decent nation should do any such thing.

Donald Regan, the White House chief of staff, put out a cryptic in-house memo: "Blame must be put at NSC's door --- rogue operation, going on without president's knowledge or sanction. When suspicions arose, he took charge, ordered investigation, bad meeting of top advisers to get at facts and find out who knew what. Try to make the best of a sensational story ... anticipate charges of 'out of control,' President doesn't know

what's going on, 'who's in charge.'" Through the congressional hearings, President Reagan's top officials followed Mr. Regan's instructions, continually touting the president as Mr. Decisive. "One of his most outstanding attributes is decisiveness," we were told. But if one follows their narratives rather than their adjec-

tives, a different Ronald Reagan appears. Repeatedly, Secretary of State George Simitz and Defense Secretary Caspar Weinberger had argued to the president that selling arms to Iran was a bad idea, sometimes in meetings at which the national security adviser and the CIA direc-tor took the opposite tack. Who won? By the ac-

By CONRAD in the Los Angeles Times.

sion. Instead they appeared in confirm Mr. Shultz's view that "nothing ever gets settled in this town" --- not even in the Oval Office.

To the public and to the world, Presiden Reagan came on loud and clear, sounding and looking decisive, as when he declared "Operation Staunch" as a national policy of oo deals with terrorists. But in the privacy of the White House, if the top-level testimony is to be believed, it was hard for the president's major advisers to discern. his thinking, for months at a time.

His curiosity was equally retarded. When his chief military, foreign policy and intelligence ad-visers pushed their battle into his presence, he sat still and listened. Controversy at the top of his administration did not stimulate him to seek out the facts. At one point Mr. Weinberger asked, "Are you really interested in my opinion?" Several times Mr. Reagan confirmed that he had

"no knowledge" of the sale of the arms for hostages

As Mr. Regan said, regarding the president's socret authorizations, "A presidential finding is not lightly made." But the president could not count of both secretaries, that was hard to answer. On occasion, each same away from such a recall making the first one, and did not think in meeting sensing that he had succeeded in laying this wacky adventure to test - only to discover,

mention in his top officers, three times in a row, that he had signed such a finding either the day before or that same day. Despite his emotional concern for the "freedom fighters," he did not uy to find out where they were getting their money. Moreover, he apparently got the balance of mili-tary power between Iran and Iraq backward.

president did not know what his own staff was doing" — and it was making major strategic moves.

his own testimony. Lieutenant Colonel Oliver North, running a big slice of foreign and military policy under the National Security Council umbrella, was in meetings with the president and a few others some 22 times, but Mr. Reagan did not get to know what the colonel knew at all. Not even when he approved the dismissals of Colonel North and Rear Admiral John Poindexter

did he summon them to give him the facts. His disciples followed his example: Mr. Shultz told Admiral Poindexter not to give him details; Mr. Weinberger was not informed that Saudi Arabia was supplying some \$25 million in the contrast neither he nor Mr. Shultz knew about the findings or the diversion of funds from the arms sales. The attorney general was not in on the crucial legal questions. In short, conflict at the top triggered withdrawal, not inquiry. Except when the story leaked. The White House

leapt inin action to manage the president's public relations — from the start its primary concern. Confused as his briefing was, Mr. Reagan once again came on as the strong leader.

In fact, the president was presiding over a daisy chain of command, in which the official at each level avoided responsible supervision of the next one down. It was a circus overseen by a disbanded cabinet whose members, supposedly responsible for making the right results happen, were satisfied if they had made their verbal points in meetings. As always, Mr. Reagan got his strongest signals from those most often in the same room with him, who led him steadily inin shredding political logic.

From the first, as Budget Director David Stockman noticed years ago and others even earlier, the danger of the Reagan presidency has been drift and accident, even chaos, rather than Nixonian rigidity. An easygoing, affectionate persona and a readily directable theatrical style set Mr. Reagan up for dependence on the luck of the draw. Now, with his military forces sprawled about the world's most dangerous terrains and waterways, be has the rest of ns set up for the risk of disaster.

## Saudi Arabia: This Time the Iranian Plot Misfired

WASHINGTON - The Saudi in-ternal security apparatus has become far more efficient and profes-

sional. As a result there is less evidence today than a decade ago of two potentially dangerous cleavages in Saudi society: pro-Iranian sympathy in the Shiite minority, and regional tension between the Najdis, the powerful Bed-ouin tribal families of the Riyadh

families of the Red Sea coast. The Shiite minority gets consider-

oil fields are, and represent about 40

percent of the labor force there.

## Break Out , And Avoid The Mines

By Stansfield Turner WASHINGTON - Disputching minesweepers to the Gulf region is not the answer to preventing attacks on international shipping. such as occurred this week when a supertanker hit a nune just outside the Strait of Hormuz. The problem is a lack of political will, not a lack of a fack of political will, not a fack of minesweeping capability of naval firepower. With a change of political guidance from the While House, most of the threat to Gulf shipping would disappear — without the need to resort in military force.

There is a common misconception that the shipping lane where a re-flagged Kuwaiti tanker, the Bridge-ton, hit a World War I vintage Iranian mine last month is only two or three miles wide. Actually, the deep water shipping lane is more than 60 miles wide from the Strait of Hormuz all the way to Kuwait.

The implications of this "discovery" for strategy in the Gulf are clear. There are two ways in counter mines. One is to sweep them, but the U.S. Navy seems not to have been well prepared for this. The other technique is simply to avoid the mines by steering ships clear of them. That is relatively easy to do in the Gulf. It would be almost impossible for Iran in mine all of the waters in the area where the Bridgeton was hit and, besides, doing so would impede Iran's own tankers.

If tanker convoys were to follow random courses through the full width of the Gulf, their chances of getting through unscathed would be high without any minesweeping. Only when they converge on the loading terminal at Kuwait would there be any need to sweep mines, and the navy already has the capabili-ty to do such small-scale sweeping. Why aren't the reflagged tankers

using the whole Gulf? Because Ayatollah Khomeini has restricted international shipping to a narrow zone. At the point the Bridgeton was hit, the convoy had been within that two-mile slice of the 60-mile-wide channel. No wonder the Iranians knew so certainly where to plant the mines.

Þ

Why is the United States respecting the Iranian's restrictions? Richard L. Armitage, assistant secretary of defense for international security affairs, has said that President Reagan approved in advance the Bridgeton's re-

maining within the two-mile zone. Not only is this not an answer, it contrasts starkly with the president's willingness twice to provoke Moammar Gadhafi of Libya over his claims to exclusive control of the Gulf of Sidra. In both instances, the United States engaged Libyan forces in com-bat. Why will it not provoke Iran?

The risk is that Iran might openly attack ships if they ventured outside the two-mile path. That would likely bring on war. The alternative is to risk more casualties to American ships and men through untraceable mine attacks. If the navy keeps using the permitted channel, nothing will deter the Iranians from continuing to mine it. Under the present policy, Washing-ton is caught between the risk that the Iranians would attack openly outside

the permitted zone and the risk that they will attack surreptil the navigational channel. Violating these restrictions and

area, and the Hijazis, the merchant

able attention from critics in the West, but the problem appears manageable for now. The Shiite population is fairly small - about 250,000 in a population of 7 million. What worries analysts is ranks of the technocracy. the fact that the Shiites are located in the Eastern Province, where the Saudi

Stung by charges of historical and cultural insensitivity, the French protest that they are in it for scientific and archaeological reasons and are not "grave robbers." They promise moreover not to sell any items they retrieve. But the pained disappointment that their operations are causing is not quite financial in source; it onmes, rather, from the long-standing power of the Titanic legend and the humility it evokes. "In a soli-tude of the sea, deep from human vanity and the pride of life that planned her, stilly couches she," Thomas Hardy wrote of the Titanic in 1914. Thirteen thousand feet, it seems, is not quite deep enough for that. - THE WASHINGTON POST.

### **Other Comment**

### The Balkans of the 1980s **Try the Security Council**

Much of the world is wondering what exactly the Reagan administration - or Security Council meet as soon as possible to the Kremlin or the Iranian government, for that matter — is up to in a region that the light of all that has happened since its is to the 1980s what the Balkans were to Europe in the summer of 1914.

Io a rare show of peace-oriented and conciliatory posture last month, the Soviet Union joined the other permanent mem-bers of the UN Security Council in calling for a cease-fire in the Gulf war. At the same time, however, the Kremlin has been making moves which might rather encourage radicals in the belligerent nations. Whatever the rights and wrongs between

Iran and Irao, the number of real or potential combatants is almost daily altering the nature of the conflict. Another loose mine, or a mindless act of terrorism or even a simple radar failure could take us to the brink.

--- The Japan Times (Tokyo).

It is now urgent that the United Nations cease-fire resolution. Iraq, whose actions have been every bit as damaging as Iran's, chose a moment of extreme tension [on · Monday], while Kuwaiti-American tankers were stalled by a mine, to attack Iranian oil installations across a wide front. The holing of the Texaco Caribbean outside the Strait of Hormuz cannot automatically be ascribed to Iran: She was carrying Iranian oil.

The main doubt must be whether the Soviet Union, whose legitimate interest in the Gulf has for so long been denied by the United Sintes, could at this stage be cajoled in to cooperation. But that is worth a determined effort, and it may be that the country best qualified to make it is Britain. - The Guardian (London)

avoiding the mines is the best recourse. It is unfair to send men and ships continually toward the mine risks of the narrow channels. If Iran is going to take America on, at least it should have to do so openly. To reduce the chance of conflict, Washington could warn Tehran of the consequences of its cootinued challenge to the right to use international waters. The way to prove that you mean business is to bring to the Gulf large oumbers of the very weapons that Iran is using: mines. Then if Iran persists in interfering with the ships that Ameri-ca is protecting, the United States should mine Iran's harbors. The navy could easily lay enough mines to cut off sca commerce between Iran and the outside world, thereby cutting off all Iran's oil exports, its principal

A mining campaign would have the advantage of being conlethal, at least until Iran challenged the mine fields. It could minimize the damage of becoming engaged in a drawn-out war with Iran, but still provide considerable short-term leverage. The United States cannot afford to

be pushed mit of the Gulf as it was pushed out of Beirut. Better that it oot give the ayatollah any such hope by continuing supinely to obey his illegal dictate about where to sail. There really is no choice other than to avoid the mines by using the broader zone and to be prepared for what the consequences may be.

The writer, a former director of the Central Intelligence Agency, contributed this comment to The New York Times.

. i . . . .

It was a pretty good street then. Working-class families lived here, a few professionals like teachers, some people looking for work and scraping along.

ON MY MIND

Decent apartments, good shopping a few blocks away on Jerome Avenue, parks and schools nearby. Nothing ever happened on Knox

Place except life, so it was startling to see the name in the newspaper, a paragraph in an article about people working to help their own neighborhoods.

It was almost four decades since I had been in the neighborhood but I found that I could get there with my eyes closed. Knox Place and Gates Place, the street around the corner where a sister and brother-in-law lived.

Most of the other streets were also named after American heroes. I thought that gave the neighborhood a certain cachet because you would run across them in schoolbooks: Rochambeau, Decatur, Bainbridge, Marion, Webster. And Dekalb, where my mother and 1 moved when \$50 a month on Knox became a little pricey. Most of the Jews and Irish who lived

on Knox have moved out; not all. There are a lot of Spanish signs on the stores and mostly black and brown faces in the street. It is still a pretty good street. I realized, with embarrassment, that I had not expected that, and had visions of graffin and broken windows. Same kind of street - decent buildings, peo-ple making a living or scraping along. But there are two important differ-

ences, and they are connected. One is that the people who live on Knox and Gates have to band together to keep it safe and decent enough for their children. In my time we did not have more

money than the people living there now, but we took it for granted that the street was a safe front yard. Who ever heard of neighborhood associations? For what?

> Letters intended for publication should be addressed "Letters to the Editor" and contain the writer's signature, name and full address. Let-ters should be brief and are subject to editing, We cannot be responsible for the return of unsolicited manuscripts.

The other difference is drugs. It is a life changing difference between my Knox Place and Mr. McKenzie's. We never heard of drugs or junkies or pushers or pills or needles. Now Mr. McKenzie and his neighbors know that neither they nor their children can live in decency on Knox or Gates or Decatur or any other street unless they fight

drugs. They fight like hell. It is tiring; a step forward, a step back. chievement or defeat is measured in

things like a play street closed to traffic. Mr. McKenzie, who makes his living working with juveniles and spends a lot of the rest of his time working with the Knox-Gates Neighborhood Association, talked intensely about the play street situation. He said that Knox Place had become a drug shopping market. Pushers would stroll the street, and customers would drive through it looking for a hny. Every child in every house knew it and saw it; some of the

kids were used as runners. The mothers and fathers wanted a street where they could keep an eye on their kids from the windows, spot the pushers and hassle them, tell the cruising customers to get out fast. They figured that if they closed the street they could use the road and sidewalks

for summer classes, games, anything to keep the kids together. The block association got Knox Place closed on July 2. And it worked quite well. The pushers went elsewhere, the

customers' cars no longer cruised Knox, the kids were within sight of the windows. A few weeks later, Traffic Department people suddenly removed the "Play Street" signs. Some people in the blocks around Knox wanted to park their cars there. They signed a petition and won. Now the street is open and pushers are coming back. The summer program has been moved to a playground on the corner, but teen-agers won't go to a playground. They drifted away.

What difference does a closed street make? Won't the pushers go a few blocks away? Yes, Mr. McKenzie said, but then the people of that block will get together. Then kids will see parents fighting drugs, on Knox Place and other streets, and not just accepting it; that is what counts. Anybody interested in neighborhood

self-help groups can write or call the Citizens Committee for New York City. And Mr. McKenzie hopes that somebody from City Hall or the borough president's office will think again about closing Knox Place. It can be found on a good city map, running between East Mosholu Parkway and Gun Hill Road, one block. The New York Times.

Humiliation at the Border Regarding "Arab Americans Report Mistreatment by Israel" (July 9):

Although Christian and of partial Jewish descent, I sympathize with the humiliation suffered by Palestinian-Americans returning to their homeland. I attribute the following experience to the fact that my U.S. passport bears the stamps of Morocco, Tunisia and Jordan, as well as a five-month Egyptian student visa from my stay at the American University in Cairo.

I entered Israel at Taba, in the Sinai, after passing the Egyptian checkpoint with no problems. The first question I was asked in Israel was, "Are you Jewish?" I have traveled to approximately 20 countries and do not recall ever before

clear customs at Taba | was the first to have my name called and the last to exit. My luggage was unpacked, every incb of over my body and inspected the beels of my shoes. One of my camera lenses was nals, personal letters and address book. Once in the midst of Jerusalem's history and physical beauty, I forgot

abont this treatment at Taba. As bad as it was, what bappened during my de-

parture from Israel was worse. The first for a maximum of three months. As question I was asked at Ben Gurion airport was again. "Are you Jewish?" someone who on several occasions has passed the same crossing points as these unfortunate people, I can testify This was the first question asked by four subsequent interrogators. that Israels soldiers address elderly men I was repeatedly questioned as to my reasons for coming to Israel and my contacts there. I was asked to submit and women as donkeys and whores, and exempt no one from humiliating search.

## When You Look, You Won't Find What You Let Vanish

### **By Peter Caws**

WASHINGTON - Dr. Michael think, that nature cunningly provides Zasloff of the National institutes remedies, but rather that almost anything gainins" (powerful natural antibioties) quoted as saying. "My political state-ment is going to be that you never know the ways of research. Let science be free .... We are not so smart as to know

### MEANWHILE

if what we do today is going to be important tomorrow." (See "Scientific important tomorrow." (See Sleuth, and a Frog. Solve a Medicul Mystery, "July 31, by Susan Okie.) Dr. Zasloff is right on target. But his work, a classic example of scientific

method - observation, wonder, conjecture, experimenting and testing - has another lesson, too: Let nature be conserved. We are not so smart as to know whether we may not need tomorrow what we casually think of destroying today. Human knowledge, like practically ev ervihing else in this complex world of ours, advances by a process that pits variety and proliferation against selection and elimination. People are always having ideas and making suggestions, and other people are always challenging and

rejecting them; the ones that survive criticism and work out in practice are added to the stock of tested wisdom. Where do the proliferation and variety

come from? In the case of ideas the answers are not always helpful - genius? serendipity? creativity? In fact it is rarer than we might think for something genuinely new to crop up, because we have inherited the products of some thousands of years of human imagination; a lot of scholarship consists of rereading and re-interpreting the work of our forebears. Even in the humanities, much of the

new comes directly or indirectly from nature — a feeling produced by an experience, an unexpected conjunction of events. But in science, nature remains one of the great and apparently inexhaustible sources of novelty. One reason for this is that nature has had millions of years to try out combinations of things. Most of them have been selected out, eliminated hy adversity --- inhospitable conditions, scarcity of resources, competition, Those that remain offer miracles of adaptation, like the ability of the clawed frog to heal itself in the soup of bacteria it inhabits. Sometimes the new is threatening. Nature has recently come up with the AIDS virus, for example, Very likely, out there

of Health, commenting on his remark- --- whether disease or remedy --- that can able and beautiful discovery of the "ma- come into being and survive, through the endless recombinations of matter in the in the skin of the African clawed frog, is energy-nich biosphere, probably has provided remedies or will do so.

Page 5

Nature, then, is the storehouse of the possible. We do not know what is in the storehouse, or whether it is of use to us, until we look. Dr. Zasloff reminds us that there are still some incredible things in there. But while he is recovering something medically invaluable from his frogs,

other frogs, and plants and insects and birds and fish, species by the thousands, are being wiped out by unwise develop-ment in Amazonia. Africa and elsewhere,

Americans know about the snail darter, the tiny fish for which environmentalists went to hat against the Tennessee Valley Authority. But many fail to see that it is not the sanctity of a species as such, or even of life as such, that makes the strongest argument for this kind of conservation. It is the irreversible loss of as yet unexplored natural structures. And no natural structure is ever, perhaps, fully explored. No extinction that could have been avoided is excusable.

It would be ironic — but we would never know — if the very organism we had needed for the cure of AIDS had been ploughed under by the bulldozers of some multinational conglomerate. Of course there are other approaches to

medical research than the extraction of naturally occurring substances. But our imaginations are not so fecund that we can afford to waste any source of variety, and we have learned that nature is not, in fact, an inexhaustible source.

It should not be the struggle it is for environmentalists to defend, case by case, the dwindling biological resources of the world. Everyone, including the executives of governments and corporations, ought to be aware of how precarious these resources - not just living things but the knowledge they promise - have become. No one can be sure that he or she may not have cause, sooner or later, to be grateful 10 Dr. Zasloff and his magaining or to the future discoveries his successors will make if we conserve their raw materials. Let science be free, indeed: Let it be taught, let it be funded. And as far as

bumanly possible - which may not mean economically profitable, and sooner or later we will have to wake up to that - let the world it studies be kept intact for it against exploitation and depredation.

The writer is a professor of philosophy at George Washington University. He contribsomewhere is (or was) a natural substance uted this comment to The Washington Post.

## U.S. Flag on 100-Peso Note **Raises Ire in Philippines**

By Keith B. Richburg Washington Post Service MANILA — A new Philippine 100-peso note has evoked a chorus of laughter, blusbes of embarrassment and cries of outrage from diebard nationalists. The problem with the bill is its colorful design, printed next to a picture of former President Manuel Roses. The design is an artist's

Inc problem with the out is its colorith design, printed next to a picture of former President Manuel Rozas. The design is an artist's rendition of a photograph of the lowering of the American flag and the raising of the Philippine flag on July 4, 1946, the country's independence day. In the picture, the Philippine flag is behind and

below the U.S. flag. According to the bill's critics, it is difficult to tell which flag is being raised and which one is coming down, and this in a country that is jealcusly protective of its hard-won independence and sensitive to any

hint of continued U.S. dominance. To nationalists, putting an American flag on a Philippine peso note is symbolic of the country's inability to break with its colonial past.

"I was quite incredulous at the first sight of that 100-peso bill with "I was quite incredulous at the first sight of that 100-peso bill with its stars and stripes lurking — sinisterly or benignly, depending on one's view of the world — from the corner of the familiar blue-violet field," wrote a journalist, Sheila Coronel, in a recent opinion page column in the Manila Chronicle. The U.S. flag looms "larger," she wrole, "with the Filipino flag crumpled in a corner."

wrole, "with the rupino flag crumpled in a corner." The central bank governor, Jose Fernandez, conceded to the Philippine Senate that the U.S. flag "appears to be unduly promi-nent." But he argued that the lowering of the U.S. flag when independence was achieved 41 years ago was a "historic event" of which there was only one known photograph. The photographer just

happened to be standing closer to the American flag, be said. Mr. Fernandez said the controversial bill is bere to stay. It would take more than two years and 140 million pesos (about \$7 million) to find another design and produce new 100-peso bills, he said. The 100-peso note is the largest denomination and the most commonly used

For now, the U.S. flag will remain unfurled on the notes, with the . ດາາຍ Philippine flag in the corner.

"If we stop producing this bill," Mr. Fernandez said, "we will have no 100-peso notes." John Reed.

tron. Rather, they say, n is something that comes from within Vietnam itself, just as economic changes in the city grew out of five years of experience with "contract" private-enterprise farming, or from a reluc-tant admission that some of the methods that had been used by the south could be applied without damaging the Communist ortho-doxy of the north. In Hanoi, private businesses

which are beginning to expand un-der liberalized city laws, are drawing families back together into ancestral homes and neighborhoods from scattered cooperatives. Old habits return, even in rough economic times. This year, for ex-

ample, Hanoi got a gardening club The new currents, thus, move in two directions: inward toward a

revival of ancient Vietnamese cultural traditions - not only in the arts - and outward for broader links with the world. Vietnam's poverty, intellectuals

say, is creating a stagnating isolationism. A European ambassador in Hanoi said this disturbs many Vietnamese who remember that Vietnam was once one of the most cosmopolitan societies in Asia.

While shelves in Hanoi bookstores groan under the weight of unsold beavy Soviet technical volumes, readers, translators and publishers press on a visitor lists of books by American authors they would like to have -- Kurt Vonnegut, William Styron, Eric Segal or they simply ask for "anything new." They want to go beyond Mark Twain, Jack London and

### INTERNATIONAL HERALD TRIBUNE, WEDNESDAY, AUGUST 12, 1987

## ARTS/LEISURE

## A Burdened 'Wandering Jew' And a Superb 'Porgy and Bess'

By Sheridan Morley ional Herald Tribune ONDON -- "Porgy and Bess,"

Paue 6

one of a brace of five-hour epics on stage this week, is the greatest glory of the summer; the other is "The Wandering Jew" at the National. There is nothing wrong with the new Mike Alfreds production on the Lyttelton stage that a few songs and maybe a textual cut of about three hours

### THE BRITISH STAGE

couldn't solve. It might even have worked on its present scale had it been conceived in the spirit of "Nicholas Nickleby" or "Les Miserables": but in the first production for his National ensemble, Alfreds has denied us anything so enjoyably theatrical as those, and come up instead with the kind of desiccated dramatized reading of random moments from a long-lost text that might just survive on radio across several dull weekends.

The first problem is the text itself. "The Wandering Jew" turns out not to be the old melodrama with which Matheson Lang used to barnstorm the countryside, but the vasily more complex Eugène Sue work published across an eternity of Parisian newsprint during the 1840s. On the evidence of this dramatization by Michelene Wandor and Alfreds. Sue seems to have lacked the strong grasp of plot and character that have made Dickens and Victor Hugo so eminently stageworthy. What Sue had was an obsession with the Jesuits, whom

he saw as a clerical Mafia out to tedium to inconsequence by way of at the RSC could manage to hijack deny the descendants of the Jew random coincidence. By the time this for their Barbican repertoire their rightful inheritance.

But before we can get to the reading of the will on which this whole top-heavy farrage depends, we are introduced to 50 characters. some of quite remarkable irrelevance and most of whom spend their time on stage describing the ornate interiors of houses we never

see - since Paul Dart's minimal set is a staircase and some curtains endlessly tugged right and left to indicate the passage of years or nations or lives. The real trouble is that despite the everlasting nature of the production, we never have long enough to know or care about any single character before we are whisked off into another sprawling subplot of religious or financial intrigue. Only in the last hour or two does Philip Voss as the marvelously snake-like evil genius Rodin rise above the rabble and fix us with his glittering sense of criminal purpose. By then our main hope is that seen by about as many people as

fortune and let us go home to a good book. Sixteen other actors led by Sian

Thomas, Mark Rylance and Paola Dionisotu do their best to double and redouble all the other inhabitants of this fragmented and sham- to be seen on a theater stage, even ally subdued, thoughtful Sportin' bling sage of missing letters, myste- one as cramped as Glynde- Life and Marietta Simpson as the rious tokens, Indian prices, bourne's; and if it does not go on to carth-mother Maria play with tre-Siberian orphans and corrupt priests. But stripped of its social tracts and philosophy, all we are one of the great dramatic and musileft with is a turgid and tangled plot cal highlights of the decade. In- comied Catfish Row, a supporting which grinds on relendessly from deed, if Nunn's former colleagues cast of 50 is able to create a choral

with comparable confidence and energy and invention. This is also the first-ever British

staging of the complete "Porgy and Bess." Under the brisk conducting of Richard Bradshaw it comes in Gershwin's anniversary year as a unique celebration of his one-shot operatic genius. For those of us who knew it mainly from old recordings and the blandly truncate movie and a somewhat deadly grand-operatie staging by a Texan company at Lincoln Center a de-

cade or so ago, what Numin is offering is a total rethink. Against the orchestral wealth of the score he has come no with a spare, tight-knit production of remarkable coherence and intelligence and integrity mances that I doubt we shall ever

# Guess which button he pushed in the lift.

You don't have to be an expert in lateral thinking to solve this particular riddle. You just have to know a little about classically elegant limousines and their drivers. The BMW 735i, for instance, is a reflection of its driver in every respect. The car's precision-steering suspension, the torsional rigidity of its bodywork, its sophisticated safety system and standard ABS, all combine to give this BMW exceptional passive safety.

Because its driver doesn't believe in taking unnecessary risks whatever he's doing. Equally, the inline, 6-cylinder engine isn't just a paragon of smooth running refinement. Thanks to its ultramodern management system, it's also a blueprint for fuel efficiency. Because its driver values anything that offers the maximum return for his investment.

The engine's 220 hp guarantees effortless and relaxed motoring as well as impressive ecceleration. It takes just 7.9 seconds to reach 100 km/h. Again, because one of its driver's favourite maxims is "time is money". Helpful electronics, like Active Check–Control, relieve the driver of the less important worries oil and windscreen washer level checks are things of the past.

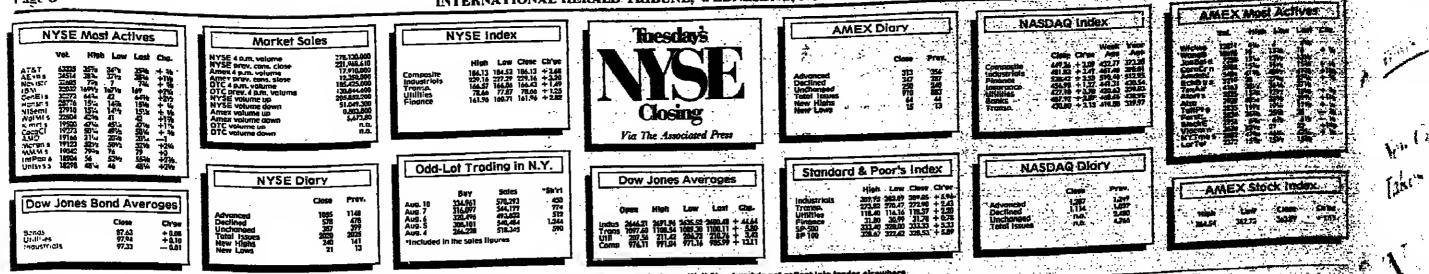

After all, everyone knows that the art of delegation and concentrating on the essentials is one of the keys to success.

Most mornings, the BMW is the first car outside the door. Which only goes to prove that to get to the top floor, you've got to stay ahead of the game.

The ultimate driving machine

## MADISON AVENUE

## New Condé Nast Magazine Takes Hard Look at Travel By CERALDINE FABRIKANT

New York Times Service

EW YORK — Condé Nast will make its first foray into the travel magazine business on Sept. 1, betting that there is an unoccupied niche, "I know a lot of travelers who don't read travel magazines," said Har-old Evans, editor in chief, in an interview at Traveler magazine's new offices on Madison Avenue. Mr. Evans, a former editor of The Times of London and the

Sunday Times, said, "Traveler will be a combination of hard journalism and literary journalism," he said. "Endless service

pieces are boring. We have to be entertaining too." Mr. Evans said the magazine's reporters would not accept the free airline trips or hotel accommodations that other publications often permit their contributors to take.

A test issue 'got the

highest response to

any offering in the

company's history."

"We are not committed to any airlines, hotels or credit cards," he said. "If we don't like a place, we can simply say

. . .

The magazine's publisher, Ron Galotti, said a test issue got the highest response to

any offering in the company's history." He said the company expected to sell about 100,000 copies on the newsstand and is aiming for about 750,000 subscriptions. The first issue carries 206 pages, of which 75 are ads from a wide variety of advertisers, including Tiffany, Ralph Lauren and BMW, A black-and-white page in Traveler will cost \$14,500 and a color page about \$21,000.

Hill, Holliday. Connors, Cosmopulos has won the \$15 million Hyatt Hotels Corp. account. Dick Pantano, vice chairman, cre-ative director, Boston, was art director, and Joe O'Neill, senior vice president, co-creative director, New York, was the writer. George J. Hill 3d, chairman, was especially proud when he considered the agencies that his people beat: Ogilvy & Mather, Tatham-Laird & Kudner, and Young & Rubicam, all of Chicago. and Fallon McElligott of Minneapolis. The Hyatt account was formerly with J. Walter Thompson Co.

Britain's Shandwick PLC, the world's largest independent public relations concern, which began buying U.S. companies last December, has acquired Simon McGarry Public Relations of Los Angeles, which specializes in high-technology companies. Shandwick said it paid \$4 million for Simon McGarry, which last year had revenue of around \$2 million. The agency will continue under its name, with its own management headed by David H. Simon, 56, president and chairman, and Marlane McGarry, 46, senior vice president.

Shandwick, which opened a U.S. operation in Stamford, Con-necticut, in June, earlier bought Rand Public Relations in New York; Henry J. Kaufman & Associates, advertising and public relations in Washington; and Rogers & Cowan in Beverly Hills, California, ...

Cahners Publishing of Boston, a trade press giant with 50 or more titles, will soon have a version of its Electronic Business circulating inside China. The expansion comes as a result of a news-gathering trip by Allen S. Furst, the editor, who learned, he said Monday, that the Chinese "want to become the leading lowcost producer of electronic gizmos." Starting with a test issue next April, the Chinese will take

material from Cahners and print and distribute around 17,800 copies of the magazine to 8,900 factories and research and development, units at, a Cahners trade fair scheduled for Beijing.

**IBM Says** It Has New Transistor Experimental, **10 Times Faster** Sumpled to Our Statt From Departures NEW YORK - International

\*\*

Business Machines Corp. announced Tuesday that it had developed experimental transistors it said are world's smallest and the most powerful of their type. The transistors can send infor-

mation for computing functions 10 times faster than transistors cur-rently on the market, the computer giant said.

1BM said the "field-effect" transistors could some day make it pos-sible to forecast weather or recognize human speech on machines the size of personal computers instead of on giant mainframe machines.

The transistors have the highest "transconductance" of any fieldeffect transistor ever measured, according to Matt Wordeman, a manager at 1BM's laboratories in Yorktown Heights, New York.

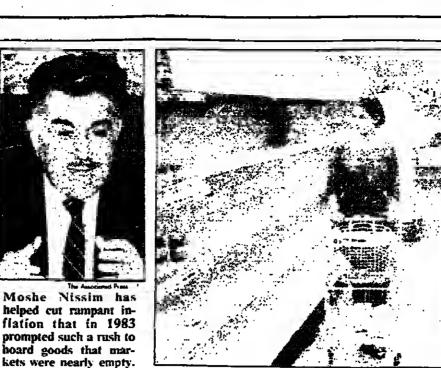

Transconductance is a basic measure of a transitor's power, its ability to send a clear, strong electronic signal. In effect, transistors are tiny on-off switches that form the basis of computers and other electronic gear. Large computer thips contain hundreds of thou-sands of them, and field-effect transistors are the most common. Computers run faster with small-

er transistors because electrical signols take less time getting from one place to another. This new transis-tor microchip is 1,000 times thinner than a strand of human hair.

The new technology, which is not expected to result in commercial products for 15 years, moves logic elements so quickly - in 10 tril-lionths of one second - that it can operate only in liquid nitrogen at minus 160 degrees centigrade (mi-nus 321 degrees Fahrenheit).

IBM said experimental techniques used to make and test the devices included advanced lithog-raphy for writing ultra-thin limes and cooling the devices during op-

eration. At room temperature the voltage ecessary to make the rapid switches damages the silicon technology. (AP, UPI)

## No Miracles for Israel's Economy Austerity Cuts Inflation to 20%. but Growth Is Elusive

By Thomas L. Friedman

Vew Und Time Series JERUSALEM — Is it a mirsome crazy Old Testament eco-nomics? Or nothing but blue smoke and mirrors, an illusion that will soon be exposed? merce.

Those are some of the ques-tions being asked here about Israel's remarkable economic recovery, which since July 1985 has reduced the country's annual inflation rate to 20 percent, from about 450 percent — without the usual side effect of unemployment.

Foreign currency reserves bave more than doubled, the shekel has been relatively stable against the dollar and the state budget --- \$23.3 billion for the financial year 1986-87 - has been brought almost into balance, after running a 12 to 15 percent deficit for the past 15

vears. Even though Israel's finance minister is named Moshe Nissim - in English. Moshe Miracles there is nothing miraculous about Israel's economic recovery. The nation simply respond-ed to some classic economic medicine - dispensed in a unique way to a unique econo-

Panasonic

By Warten Getler International the sold To Ison LONDON - Britain's widest measure of trade improved to a provisional £165 million (\$263 million) deficit in June from a revised £527 million defieit in May, the Department of Trade and Industry

said Tuesday. The figures helped calm jitters in the financial markets, which feared that the Brinsh economy was over-beating on demand for imports and that inflation would rise. Those wormes increased on Thursday. when the Bank of England forced commercial banks to raise their base lending rates ! percentage point to 10 percent.

June's deficit in the current account, which includes merchandise trade as well as services such as shipping and banking and certain financial transfers, was in line with market forecasts of a £100 million to £200 million deficit, and convinced analysis that the massive deficit in May was an aberration. "Today's trade figures are in line with a trend, rather than last month's very bad numbers," said

Geoffrey Dennis, an economist Whatever the growth rate, with James Capel & Co., a London however, Israeli consumers are brokerage. ergoying the newfound thrill of knowing that the price of an item today will likely be the same to-

The May deficit was originally reported at £561 million. Britain's overall deficit in merchandise trade also narrowed sharply in June. to £768 million. from £1,127 billion in May, revised downward from £1,16 billion. Excluding the oil sector and thus giving a clearer indication of Britain's

competitiveness, the merchandise trade deficit dropped by about one-third to  $\pounds 1$  billion from  $\pounds 1.49$  billion in May. Overall exports in June totaled £6,373 billion, seasonally adjusted, up half a percent from May, Imports were valued at a seasonally adjusted £7.140 billion, down 4.5

percent from May, However, several economists unes were very good, and today's wiced concern that June's trade trade numbers were O.K.," said ment in the rapid growth in imports

of consumer goods.

The markets had already recovered ground Monday on better- growth thereafter,"

U.S. Revises Trade Deficit for '86 Downward

Page 9

WASHINGTON - The Commerce Department said Tuesday that the 1986 merchandise trade deficit had been evised to \$156.2 billion from \$166.3 billion as part of a recon-ciliation of Canadian and U.S. rade data.

Robert Ortner, undersecreary of commerce for economic affairs, said annual trade balances from 1970 through 1986 were being adjusted because U.S. exports to Canada had been undercounted.

In addition, trade deficit figures for the first five months of 1987 are being revised and will he announced Friday, when the merchandise trade figures for June are released, In June, the department said

that a joint Canadian-U.S. team's study had shown that instead of a \$22.9 billion deficit in trade with Canada in 1986. the United States had a \$13.3 billion deficit.

The main reason was that U.S. truckers had failed to file focuments when they left the United States, it said,

than-expected figures for July's wholesale prices. After the trade figures, the Financial Times-Stock Exchange index of 100 leading shares closed 33.20 points higher. The markets on Thursday and Friday had interpreted the Bank of England's move as a sign of impending bad trade and inflation data to be released this week.

"Yesterday's producer price figfigures showed little sign of abate. Mr. Dennis of James Capel, ment in the rapid growth in imports "We've got three more hurdles to - inflation and earnings data later this week and money-supply

Honda, which began building cars in the United States in 1982, has been rewarded handsomely for

its early gamble on U.S. production. With a steady supply of U.S.-built cars unlimited by quotas, Honda has been able to overtake Toyota for U.S.

sales leadership among the Japanese automakers, with about 6 percent of the total market.

Nissan began making small trucks in Smyrna, Tennessee, in 1985 and added cars the next year. In 1986, output at the Smyrna plant was about

240,000 cars and trucks, and the company said it

hoped to double capacity, with a new production target of 500,000 vehicles a year.

Toyota announced in 1985 that it would set up a

plant in the United States with production to start

## Lloyds to Buy Stake in U.S. **Fund Adviser**

NEW YORK - Weiss, Peck & Gree, a privately held New York investment partnership, said Tuesday that it had signed an agreement for Lloyds Bank PLC to acquire a 24.9 percent limited partnership in-

It did not disclose the terms, butin London, Lloyds said the pur-chase price would be \$67.5 million in cash.

The move follows a rush of British purchases of U.S. companies. including a subsidiary of National Westminster Bank PLC's acquision of First Jersey National Corp. Weiss, Peck said the agreement had been approved by the U.S. Federal Reserve Board and ap-proval from the New York Stock Exchange was expected shortly." Closing is expected to be on Aug.

The firm said its partners would continue to control and manage. But the agreement includes a provision under which Lloyds could raise its interest to 49.9 percent if U.S. regulations allowed, it

said. Weiss, Peck is involved in invest. U.S. company's subsidiary de Ha-ment management; ventore zipital-and middle-management buyouts. Boeing orders totaled \$11.1 billion

limited partnerships.

NEW YORK — Apple Comput-er Inc. introduced on Tuesday new products for its Macintosh person-al computer that control to the formation of the set of the

Analysis said the main advantage of the MultiFinder operating system is its ability to let the machine handle several jobs at one time.

IBM and vendors of IBM-compatible personal computers will be able to offer this capability, known as multitasking, using the OS/2 op-erating system developed by Mi-crosoft Corp. But OS/2 will not be ready until early next year.

The HyperCard, under develop-They said it would also strength- ment for three years, is a software tion among home and school per-sonal computer users. "By the time IBM matches ap-pertino, California.

It allows users to write their own

Bruce Lupatkin, a computer ana-lyst with Hambrecht & Quist in San Francisco, said HyperCard is the first database, or computerized file, software system to add video, music, voice and animation to what was once a text-only world.

DETROIT — Honda Corp., which has devel-oped the largest American manufacturing base of any Japanese automater, says it will decide by the end of the year whether to build a second U.S. ssembly plant to produce its laxury Acura line, now imported from Japan. Shinichi Tanaka, a Honda spokesman in De-troit, said Monday that if the company decided to go ahead with the plant, the facility could begin production as each as 1990 Analysts said HyperCard is so casy to use that even first-time computer buyers would be able to

understand it. HyperCard will be included free with all new Macintosh computers from Aug. 15, and MultiFinder from September. Both will be available for separate purchase for \$49.

Also introduced Tuesday were the ImageWriter LQ, a high-quality printer at \$1,399, and the Apple-Fax modem for sending and receiving facsimiles over telephone lines, at \$699. Both will be available later this year.

a share, from \$32.3 million, or 25

cents a share, a year earlier. Revenue rose 42 percent to \$637.1 million, from \$448.3 mil-

ceived firm orders for 93 aircraft during the first half, up 48 percent from 63 planes in the comparable 1986 period, while Boeing Co. reported a drop in half-year sales.

According to figures released by the companies, Boeing booked or-ders for 208 jets during the first half, down 16 percent from 247 for the same period last year. Including

It manages aboot \$5 billion for for the first half, down \$1 billion individual and institutional clients. from the first half of 1986.

### INTERNATIONAL SECURITIES FUND S.A. Società Antorna

(LAT, AP)

Registered office: 14, rae Aldringen - LUXEMBOURG (R.C. Luxembourg B 7.751)

NOTICE OF EXTRAORDINARY SHAREHOLDERS' MEETING to be held in Luxembourg of the registered office of the corporation on August 21, 1987 of 10 a.m. with following

AGENDA

Cancellation of the third and the fourth resolution of the Share-holders' Meeting dated April 2nd, 1981 with respect to an autho-rized capital of the corporation of five million United States dollars (U.S. \$5.000.000).

(U.S. \$5.000.000). Amendment of article 5 of the Articles of Association of the Corporation through addition of a second paragraph in order to allow the creation of an authorized capital of the corporation of twenty million United States dollars (U.S. \$20,000,000) to be represented by twenty million (20,000,000) authorized shares either in bearer or registered form with a per value of one United States dollar (U.S. \$1) each for the maximum period of time suthorized by law authorized by law.

Amendment of article 7 (2nd paragraph) of the Articles of Association of the Corporation in order to determine the onthority and power to be granted to the board of directors in order to execute increases of the subscribed corporate capital within the authorized capital, more specifically in that respect outhority and power to be granted to the board of directors in order to waive all preferential abscription rights of former shareholders in relation to such

Thirty months ago the dollar was being viewed popularly as o prime investment while gold and platinum were abandoned by the General Public. Now with gold and platinum soaring again and the dollar down 1,62 Deutschmarks from its early — B5 highs, and international news service has quoted a leading economist as perceiving that the U.S. currency is felt to be making a top. If the dollar is actually forming a bottom instead — and if serious professionals are taking precious-metals profits in order to buy into a presumed dollar glut — contemporary price structures in a number of vital areas could be in line for dramatic revers Directional traders have made so many billions in recent markets that any supply glut which frightens amateur tracters is apt to be viewed as a new buying opportunity by the professional minority. Oil went through this transition. And now managers at Indigo are assessing media ranging from depressed computer stocks to coffee futures that could stage similar rebounds. Daniel Holland, an assistant vice president at Discount Corp., said the dollar "was fueled by continued tensions in the Middle East, and that's about it."

The dollar is seen as a safe haven during times of unrest.

The dollar at one stage broke on Monday. inrough the 1.9 Deutsche mark barrier, trading at 1.9012, a six-month

But dealers said the dollar hit resistance at higher levels on speculation that the Federal Reserve should underpin the dollar, a haven stepped in to buy dollars and keep in times of crisis, at least until U.S. the currency's rise in check.

The dollar fell back later to close Friday, dealers said at 1.8940 DM in New York, still up from 1.8920 on Monday.

The dollar followed a similar course against the Japanese yen, closing at at 151.175 yen, up from 151.025 on Monday.

The dollar also closed at 6.3170 French francs, up from 6.3115, and at 1.5740 Swiss francs, up from 1.5715.

**Further Inflation** As Pound Sags Renaers BEIRUT - Further falls in the value of the Lebanese pound increased apprehension among Lebanese on Tuesday and sent them rushing to slock

up on basic necessities before prices go up again. Lebanon's acting prime minister, Salim al-Hoss, on Mon-day proposed selling 20 percent of the country's gold reserves to

فحربان فيرتاه الرابن المنحن ليستري منارسي معاملا وتشفيه فللقل

Lebanese Fear

bolster the pound. The pound fell to a record

low of 236 to the U.S. dollar on Tuesday before recovering to close at 221, compared with 219.50 at Monday's close.

The currency, previously the Middle East's strongest, has lost 62 percent of its value this year, fueling inflation to about 200 percent. Believing the pound would

slump even further, traders kept buying dollars despite its a dealer said of Tuesday's decline.

(Continued from first finance page) get and the Bank of Israel said it the very next day have a dramatic interest rates worldwide. Israel and the leading theoretician behind would freeze the exchange rate at the recovery program. "There was 1.5 shekels to the dollar to stabilize the added: "To achieve the same cign-currency expenditures in each the recovery program. "There was 1.5 shekels to the dollar to stabilize capital flight and even talk about raw-material import prices. the need for a "strongman' to take The bank also raised interest

the shekel. The currency is linked to the dollar and during the period of reform the dollar was falling against European currencies.

As a result, Israel was able virtually to freeze its officia: dollar/shekel exchange rate - thus providing the public with the appearance of a stable currency - while effectively devaluing the shekel against the currencies of European nations with which Israel transacts twothirds of its trade. That helped Israel's exports remain competitive. mately implemented. But he was The dollar currently huys 1.6235 shekels.

Perhaps the biggest lesson of the past two years, however, is one the israelis are still learning: that all that has been accomplished so far Almost a year later, with the economy near collapse and his political future on the line, Mr. Peres is just the easy part. The current 20 percent annual vigorously championed the pro-

rate of inflation is not sustainable, At one point, Mr. Peres kept his Yisrael Kessar, represents 90 per-cent of Israeli workers and owns 25 most 20 hours unuil a consensus jor trading partners have rates jor trading partners have rates around 5 percent. If Israel's inflation is not brought into line, sooner or later the shekel will have to be management perspective. The two major political parties, Labor and Likud, have been ruling er would have happened," said a dollar. Then, raw material costs cooperatively in a coalition — so senior economic adviser, pointing will rise, prices will rise, wages will be would have been ruling er would have happened," said a dollar. Then, raw material costs cooperatively in a coalition — so senior economic adviser, pointing will rise, prices will rise, wages will be rise, "and in two years we will be right back to 450 percent," be said. The government, Mr. Nissim said, must hold the line on wage placed Mr. Peres as prime minister settlements and its spending for an indefinite period, while gradually Lesson No. 5: It helps to be lifting price freezes. It must also lucky and to have a rich Uncle the limited tax reform and expan capital market liberalization, so Because of low crude oil and that investment and saving become

Compared with the U.S. bond markets, most trading in Japan is concentrated in bond fu-tures and the No. 89, said Ron Napier, econo-

mist for Salomon Brothers here. With interest rates in Japan higher, the dif-

ferential between yields on Japanese govern-ment bonds and U.S. Treasury securities has narrowed. The larger the gap the more inclined the Japanese have been to invest in Treasury securities. In mid-May, the differential was about 6 percentage points; now it is just under 4

Despite the smaller gap, bowever, there ap-pears little chance that Japanese investors will stay away from Treasury issues altogether. An-alysts said the differential was still large enough to attract the Japanese.

evel traders realized was too low, said Peter Morgan, chief economist for Barclays deZoete Wedd.

A resulting "correction" gathered momen-tum as a sharp increase in the money supply encouraged the Bank of Japan to act to curb speculation in stocks and bonds.

"We've had a really big change in the psy-chology of interest rates," Mr. Napier said, "The Bank of Japan started saying, We've got inflation,' and that created the impression in the market that there was a potential inflationary problem, and the markets tended to push rates up."

ers had discovered that the small uncomputerized grocers were not as efficient as the big chains at keeping up with soaring prices. Lesson No. 2: To halt inflation overnight, ynu need a compromise social contract between governpercent of the nation's industry, was reached on the package, partic-That makes it quite sensitive to a ularly on the issue of cutting the ment and labor unions, industrialists and the self-employed.

## BOOKS

THE RUSSIAN ALBUM

By Michael Ignatieff. Illustrated. 191 pages. \$18.95. Elizabeth Sifton-Viking Inc. 40 West 23d Street, New York, N.Y. 10010.

### Reviewed by Walter Goodman

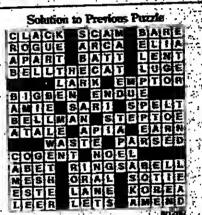

WE owe Michael Ignatieff's engrossing Russian Album" to the penchant of his forebears for keeping diaries and posing for photographs. The main figures in this elegate, evocation of a society that was exploded by the Russian Revolution are the author's grandlather and grandmother. \_\_\_\_\_

He gives the Ignatieff pedigree: "My grand-father Paul Ignatieff was minister of education in the last cabinet of Czar Nicholas II." Paul's. wife, born Princess Natasha Mesuchersky, counted in her family "a chancellor of Russia, counten in her family "a chancellor of Russia, a general who put down the peasant rebellion of Pugachev and the first modern historian of her country, Nicholas Karamzin." The Igna-tieff line has also been fortunate in Michael a Canadian bistorian and action to a little Canadian historian and writer, whose diligen and imagination has drawn life from the family memoirs.

It's a rich story, of a cultivated elite bound to a disintegrating autocracy. Several of the mi-nor characters might have come out of Dostoyevsky (an uncle of Natasha's is described as a "perty informer, tattler, toady, a creature of perverted sexual taste, pulp novelist, embezzler"].

The family's glorious past was like a treasure too heavy to be home very far into the 20th too neavy to oe nome very far into me data century. We learn how grandfather Paul's own grandfather, also called Paul, earned the grati-tude of successive cears first by fighting Napo-leon, then by quashing student demonstra-tions. It was his order that sent the young tions. It was his order that sent the young Dostoyevsky to prison. Between the two Pauls came Nicholas, whose diplomacy secured a vast area in Asia for Russia and made it the superpower of the Balkans; he enhanced his line by marrying the great-granddaughter of Field Marshal Mikhail Katuzov, who defeated, Narolans is Service in 1812 Napoleon at Smolensk in 1812. ignatieff's method is to begin, say, with a

photograph, and set his research to work and his imagination to play. Coming on a picture of Natasha in formal dress, he ventures that si

might have been raken bit a court photologi pher at the Winter Palace in house of the son pher at the Winter Palace in house of the 30th anniversary of the Romanov dvination 1412 By the end of the paragraph, "high" has become "was": "In the one date was gined only for an instant's glance at the finget frozen face of the cropress framed between phitering repet of pearls that deteended from her headdress."

George Brett hit two home runs tabuli added one apiece, powering runs, and Alfredo Griffin and Luis the Kansas City Royals to a 10-1 Biellacking of the Yankees, who have lost seven of their last 10 games (in four of the seven losses, New York pitchers have allowed at least 10 runs; on the current road trip, which includes a 7-0 victory over Detroit, the Yankees have

been outscored by 64-25) Last Saturday, team owner Geroge Steinbrenner issued a press release severely critical of PinieLa, and several Yankees had come to the manager's defense. But after Monday's rout, Steinbrenner didn't think he'd seen much of that backing on the field.

Reading from notes dictated by Steinbrenner, a spokesman said, "He is glad that cinb support is behind Lou and not behind him. If it means going out and hot behind mm. It it means going out and losing 15-4 and light, who needs that kind of sup-port? They [the players] say they're behind Low, but he would rather do without that kind of support."

Kansas City left-hander Danny Jackson won a second straight start for the first time since Aug. 16 and 22; 1986 — a span of 34 starts. He allowed six hits, walked three and struck out five in recording his seventh complete game. Brad Arns-berg absorbed the Yankees' 10th road loss in its last 13 games.

Seitzer and Brett hit consecutive homers in the third inning. Seitzer's 11th of the year, a two-run shot to left-center, gave the rookie 12 RBIs in his last 10 games, during which span be is batting .439. Brett's home run extended his hitting streak to 14 games; leading off the eighth, he registered the ninth twohomer game of his career.

After releasing Saturday's statement, Steinbrenner had said he would have no further remarks about Piniella or the club's current fortunes. When told of Steinbrenrer's latest comments, Piniella stook his head and said, "These players are giving full effort. We're in good position — it's not like we're 10 or 12 games out of first place, we're a half-game out. We'll weekend incidents that included attempts to encourget this thing turned around ....

"I've never been a quitter and I think everybody knows that," Piniella said. "I've always been an organization man and I've approached this job with integrity and good work ethics. But this - this has taken a piece of my heart away." . In attendance at Monday's game were Billy Martin and Clyde King - two former managers hired and, fired by Steinbrenner, Martin was bers, mostly Cuban exiles living in south Florida, are opposed to Fidel Castro, the Cuban president. ### American Yacht Is First in Fastnet

PLYMOUTH. England - The U.S. yacht Nirvana was first across the finish line Tuesday in the 605mile (973-kilometer) Fastnet race. ighe Maxi A-class boat, at 82 feet (249 meters) the biggest of the 195-member fleet, reached Plymouth in 3 days, 2 hours, 7 minutes and 25 seconds. The Fastnet record, set two years ago by Nirvana's owner, Marvin Green, is 2 days and 12 hours. The leaders in the Admiral's Cup section of the race were expected to Finish late Tue day.

Miguel Remón, a veteran of the Bay of Pigs

ould not

Cubans tore up the fliers and threw them back.

After the game a scuffle broke out among several Atlanta fans and four members of the group, two men and two women. One of the men was reportedly beaten.

As a precautionary step against further trouble Annee said the police department would re-evalate its surveillance over the remaining 14 days of competition to have its personnel "better strategically located." Organizers of the games also offered to provide body guards for the Cuban leaders — an offer that was Gold Medalists

accepted, according to several sources. These measures still did not deter all disruptive

activity. On Monday a telephone caller to Indiana ponis U.S. University said a bomb had been planted in the natatorium, the venue for swimming and diving, according to the campus police. While oo competition was in progress at the time, the building was cleared, and a search was conducted. No bomb was found.

Earlier, Annee and John L. Krauss, the deputy U.S. mayor of Indianapolis, as well as members of the ding. Cuba organizing committee, told ranking members of the

Cuoan delegation of the increased security measures. "They promised to give us all the help they could." said Angel Pino, Cuba's chief of mission. He described Gonzalez as being unbranch but statements and stateme Gonzalez as being unhappy but not angry over the situation, and satisfied that no government agency in the United States was involved.

"Cuba knows that our government has no part in this, that we baven't instigated anything." Edward J. Derwinski, the undersecretary of state for security assistance, said from Washington. He added that the incidents are not likely to affect the limited relationship between Washington and Havana. "Government to government," he said, "it's a nonfactor."

Derwinski suggested that if the objective of these groups was to promote defections, the visibility of their efforts would probably make them ineffective. "I hope in a day or two, they wake up sober," he said.

### **INTERNATIONAL HERALD TRIBUNE, WEDNESDAY, AUGUST 12, 1987**

### **OBSERVER**

That Old Bermuda High

By Russell Baker Nget the world right. Take this summer's heat in the United States. The newspapers say it is hotter than most summers' heat, and the reason is a pool of hot air located at 20,000 feet over the middle of the United States.

One report in a reputable paper said the pool was cigar-shaped and drifting around aimlessly, now moving up toward the Great Lakes. now sloshing back loward the southwestern desert.

Weather fans, I put it to you: Is this hot-air pool in the sky not a complete revision of everything we were taught at TV Weatherman College right after the Mickey Mouse Club went off and the news department clunks got through reading the daily Associated Press leads about Communist nastiness? What they told us was that sum-

mer's awful heat was caused by the notorious Bermuda high, right? Re-member the maps with the gorgeous voluptuous curves and the big H for "high pressure" over Myrtle Beach, South Carolina?

"We've got this big old Bermuda high," the weather professor always said. "This big old Bermuda high," he always said, propagandizing us to think of it as an old friend, maybe a sort of meteorological sloppy, overweight uncle who came over on Saturday night and drank a lot of gin and sprawled all over the couci

And what did we know about the air movement around a high? That the air moved clockwise!

"Right!" cried the weatherman. "With the air movement clockwise around the high, it'll keep pumping all this hot air up from the South-west out of the Gulf of Mexico."

Remember how you hated the Gulf of Mexico after two weeks of a big old Bermuda high pumping all that hot air up from the Southwest?

п

Several years went by before they discovered the jet stream. That was a surprise. The old-time TV weather professor never told us about the jet stream. It was all fronts and pressure areas and wind blowing. Clockwise around a high, counterclockwise around a low. Obviously, they hadn't even

known the jet stream was up there. Probably they couldn't get up high

enough to notice the jet stream un-til Chuck Yeager came along. In the old days of the big sexy curves with the H's, the only drama came from vicious lines with cruel, pointed teeth coming out of Canada. No doubt what one of those was, eh, weather fans? It was the famous cold front, which just might, if we were lucky, blow that old Bermuda high out of here and give us a wind from the Northwest, which meant - relief! "Yes, there is a chance we're going to get a little relief," were the famous words that

reuer, were the famous words that accompanied those pointed teeth. Discovery of the jet stream creat-ed an entirely new view of the mete-orological cataclysm. Now the map was dominated by a sinuously wriggling rope-like thing whose vermiform structure pulsated un-predictably north and south, south and north sometimes buckling unand north, sometimes buckling up-ward in a great loop toward Cana-da, other times downward toward Mexico as though in 8 continent-wide state of peristalsis.

Pointing to this formidable display, the weatherman lectured on the quixotic nature of the jet stream. "Here's our jet stream staying well up over the northern tier, but there's a chance it could dip down here all the way to --- '

We were now in weather gradu-ate school. The difference between the old-time voluptuous curves and the jet stream was the difference

between "The Cat in the Hat" and being at Yale with the theory of deconstruction.

deconstruction. When children glistening with perspiration asked, "When's it go-ing to be cool enough to breathe again?" you spoke with authority: "Not until the jet stream moves down off the Yukon and dips into Oklahoma so it can blow that old Bermuda high out of here." You didn't know about that ele-

vated pool of hot air, did you? Didn't know that regardless how the wind blows or where the jet stream lies, newly discovered hotair pools could keep you roasting. What's dispiriting about learning that nobody knew much when you were young is the logically en-suing conclusion that your grand-children will someday learn that nobody knew much when you were

old, either. It makes you realize there's no relief in sight,

New York Times Service

**Clarice** Taylor (right) weaves together the raunchy humor and tragic life story of the comedienne in the play 'Moms' in New York.

## **Moms Mabley: Pain Behind The Laughter**

By Leslie Bennetts

New York Times Service EW YORK -Several years ago Clar-N EW YORK — Several years ago Clar-ice Taylor was sitting in a restaurant one day telling Moms Mabley jokes. She was shocked when a friend interrupted to ask, "Who's Moms Mabley?" "I said, Just wait a reinute — I'm going

to teach all you white people who Moms Mabley is! How dare you not know who Moms Mabley is?" Taylor recalled. What began as an indignant impulse turned into something of an obsession. Taylor, who has become known to a na-tional U.S. television audience as Bill

Cosby's mother on "The Cosby Show," tracked down and interviewed surviving members of Moms Mabley's family. Mabley, who had been a vaudeville star for half a century when white audiences began to discover her, died in 1975 at the

age of 81. Both her raunchy humor and the poignant story of her life have been interwoven in "Moms," a play with music that opened last week at the Astor Place Theater. "Moms," which enjoyed a sold-out run last winter in an earlier version, was based on a concept by Taylor, who stars in the production, it was written by Ben Caldwell, a Harlem-born playwright and

author. "I decided I was going to do Moms as I remember her," explained Taylor, who grew up in Harlem and still lives there. "I knew her from sitting in the andience at the Apollo Theater falling out of my seat laughing at her. I wanted to do it like she

had done - to go up onstage and tell all her jokes." But as Taylor researched Mabley's life, a

different dimension began to creep into her vision of the piece. "When I saw her, it never dawned on me to even think whether she was ever married, whether she had children, whether she ever cried. She was just Moms Mabley who was going to make me laugh, so that was all I wanted to do with my evening with Moms." However, when friends read Taylor's ini-

tial draft of a script, they wanted to know more about Mabley's life. "I realized I'd like to know more about her, too," Taylor said. That information proved hard to come by, but she managed to track down Mahley's hrother, her adopted son, her daughter and her half-brother. "I just went everywhere, following all the leads."

What she learned was heartbreaking. Although Mabley spent her professional life making people laugh, her personal life had more than its share of grief. The great-granddaughter of a slave, she was born Loretta Mary Aiken in North Carolina in 1894, one of 16 children. She was raped at the age of 11 by an older black man, and raped again two years later by the white town sheriff. Both rapes resulted in pregnancies; both babies were given away.

Loretta's father, a volunteer fireman, was killed when a fire engine exploded, and her mother was run over and killed by a truck while coming home from church on Christmas Day. At the age of 14, Loretta ran away to join a minstrel show. Although

it is unclear whether she was ever married, she bore another daughter later on, only to see her become a drug addict.

As a performer, she changed her name to Jackie Mabley, later acquiring the nick-name "Moms," and the career she launched as a runaway child ultimately carned her such material perquisites as a chanffeur-driven Rolls-Royce and a sable in a movie, "Amazing Grace."

According to my research, she was our only black comedienne; I don't know of any other in those years," said Taylor. "She was finally discovered by whites in the 1960s. But most of her jokes at the beginning were 'in' jokes. She talked about things black people understood. She talked about white people, and she told us things we wanted to hear about them."

Mabley also talked about sex inc ly. Her humor leaned toward the double entendre rather than the use of obscenity that would become popular with such later black comedians as Richard Pryor.

Although Mabley was a lesbian, according to Taylor, her favorite persona was that of "dirty old lady" with a penchant for younger men. She made fun of older men, ridiculing the ways they wielded authority over women as well as the decline of their sexual powers. Her signature line became: "Ain't nothin' an old man can do for me hut bring me a message from a young

man Once a favorite at the Cotton Club in Harlem and the Club Harlem in Atlantic

sie, Duke Ellington and Cab Calloway, Mabley in ber later years went on to appear on national television with Mery Griffin, Johnny Carson, Flip Wilson, Mike Dong-las, the Smothers Brothers and Bill Cosby, and to play Caruegie Hall, the Kennedy Center and the Copacabana. In the last year of her life she starred for the first time

÷-

Taylor - who describes her age as "between 55 and 80" — attributes the success of her idea to higher powers. "Once I got started on this, I felt like I was on the end of a comet. I always say that Moms has taken charge of this from the grave. I know I'm not in charge of it; had I been in charge of it, I'd still be sitting in my backyard. All I ever hoped for was for somebody to let, me do a reading one evening somewhere, but I ended up producing this show. If anybody had told me f could raise \$300,000 — why, I didn't know I could raise \$300. My mother is 94 years old, but I was on the phone to her: Mother, how

much money you got?" I was begging every-one I knew, and the next thing I knew we got theaters, there's a big ad, we got this advance ticket sale, all kinds of things. It's going to take me five years from now to pinch myself and say, 'It's really hap-

pened." Above all, Taylor bupes to answer the question first asked her by an uninformed friend. "I would like people to know Moms as I have become acquainted with her, and to love her as much as I do," she said, then added softly, "and to know it wasn't easy." City, where she performed with Count Ba-

## 'Chorus Line' Adds Line For 5,001st Performance

"A Chorus Line." the langest running show in Broadway history, celebrated its 5,001st performance Monday night with a double line of dancers related from the New dancers selected from the New York cast and stock and amateur Fork cast and slocs and antaleur productions around the country. "It was an opening night tonight," said Joseph Papp, head of the New York Shakespeare Festival, which produced the Tony award winning produced the Tony award-winning musical. " Chorus Line' will run as Inusical. - Chorus Line will run as long as Broadway exists." To cele-brate the show's 5,000th perfor-mance, which took place Saturday." the Shakespeare Festival held a contest come to envoire who had contest open to anyone who had appeared in a licensed stock or amateur production of "A Chorus Line" in the United States. The festival received nearly 800 entries from 40 states. Nineteen winners -one for each role in the show -were flown to New York and ap-peared with the New York cast Monday in the show's final dance mmber.

A violin that the Italian virtuoso Niccold Paganini used to play will be flown to Buenos Aires for a concert. Despite protests by some experts that the trip to Argentina might damage the instrument, the Genoa city government decided in loan the violin for the "Genoa-A" gentina" festival. Carlo Chiarappa will play the violin, made by Giu-seppe Guarneri in 1742, in a concert on Aug. 24 in the Coliscum theater, in Buenos Aires. Paganini was born in Genoa in 1782.

Queen Bentrix of the Nether-lands left a bospital in The Hague after almost a week of treatment for viral meningitis, a spokesman for the royal family announced. 

- 1 A

Zsa Zsa Gabor fired off a series of one-liners to a roomful of lawyers about their mutual area of ex-pertise: divorce. "Thank you, dahlings — you guys made me rich and famous." the actress, who has been married eight times, told the American Bar Association's convention Monday in San Francisco. Gabor, the luncheon speaker at a standingroom-only gathering of divorce lawyers meeting to talk about family law, had a rapt audience for her observations. "Lawyers make good", husbands," she said, "They know everything and suspect nothing."
